

Resources available to facilitate **advanced statistics for your project.**

The best approach is to first fill out this [form](#) with a PI listed (Dr. Fried can be your PI for all QIP-related projects). After submitting, you will either contact or be set up with a Teams meeting with one of the Northwell statisticians (Tung Ming Leung, PhD - Tleung3@northwell.edu or Dimitre Stefanov, PhD - Dstefanv@northwell.edu).

Lastly, these statisticians generally prefer that all data is recorded in **REDCap** as it protects HPI and makes their job as statisticians more straightforward. The Chief Residents also serve as resource to teach anyone how to use REDCap, but the first step is just emailing: REDCap@northwell.edu to have them set up an account for you and your QIP partner based on your Northwell usernames.
